Mercy University Hospital **Mission Statement**

In keeping with the philosophy of the Sisters of Mercy, our mission is to provide a high quality health care service in the spirit of Christian Concern, in order to maintain and improve the health and well being of individuals, families and the community we serve. This we achieve by our caring and support for the sick, suffering and grieving without prejudice.

Introduction

After 155 years of service to the community Mercy University Hospital continues to play a pivotal role in the provision of compassionate high-tech quality healthcare for the people of this region.

Mercy University Hospital has a culture of unique patient centered care and compassion, which is based on strong core values handed down by the Sisters Of Mercy.

Our hospital continues to offer a comprehensive range of in-patient and out-patient services, including a 24/7 Emergency Department, an Urgent Care Centre, amputee service and leading medical and surgical specialties. These services are provided by dedicated highly trained multi disciplinary specialist teams and highly respected and experienced professionals.

Development of Mercy University Hospital's range of services is ongoing with a number of key innovations in the pipeline including expansion of the hospital's widely recognised Gastroenterology Department, the opening of a new Acute Medical Assessment Unit (AMAU) and enhanced diagnostic capability in radiology.

Our vision for the Mercy is for a stronger more sustainable tertiary acute general hospital that will continue to serve the people of Munster for many decades to come, having maximised the opportunities within the reconfiguration of Cork and Kerry hospitals.

Our relationship with primary care and other providers is critical to ensure a joint integrated team based approach to patient care. We are acutely aware that the hospital's relationship with its community partners is central to the success of the hospital and as key stakeholders we look forward to continued and future engagement as we work together in the management of acute and chronic illness including preventative care.

We hope that this directory is a useful tool for you and we would welcome any feedback you might have.

Sandra Daly,
Chief Executive Officer

Mercy University Hospital Hospital Profile

Mercy University Hospital was established by the Mercy Order in 1857 as a 40 bed hospital staffed by four Sisters. In the intervening years it has expanded rapidly both in terms of facilities and accommodation, becoming the second largest Hospital in Cork.

Indeed in the last number of years, Mercy University Hospital has undergone very significant capital development allowing it to relocate its public wards into a new building and allowing further development of various specialities within the Hospital, including a 50 bed Acute Psychiatric Unit, new Pathology and Clinical Pharmacology Units, new Endoscopy suites, Medical Oncology Unit, Coronary Care Unit, Acute Geriatric Assessment Unit, Mens Health Unit, new Emergency Department, POLAR Unit (with the National Rehabilitation Hospital), Clinical Research Facility (with UCC) and a Stroke Unit. The hospital will be opening an Acute Medical Admissions Unit, a COPD Outreach Unit and we are progressing the development of a Regional Gastroenterology Unit that will be governed by the Mercy in the near future.

Located in the busy centre of Cork, Mercy University Hospital is a voluntary, general acute hospital catering for both public and private patients.

The hospital provides approximately 325 beds and offers a wide range of specialities which provide in-patient, day patient, outpatient and accident and emergency services which is open 24/7.

The hospital also participates in the Medical Undergraduate Training Programme which runs in association with the National University of Ireland. Mercy University Hospital supports students completing the four years BSc Nursing Programme with the provision of Clinical Placement, Co-ordinators, Preceptors and facilitates a positive clinical learning environment.

A Clinical Ethics Committee (C.E.C) is in place in the Mercy University Hospital. Its purpose is to provide a referral facility and an information resource on ethical principles for the staff of the hospital.

Mercy Urgent Care Centre

Consultants	Phone
McCarthy, Dr Gerry	
Reception	021 4926900 / 4926901

The Urgent Care Centre, which treats patients with minor injuries, opened in March in St Mary's Health Campus (former St Mary's Orthopaedic Hospital) Gurrabraher. This centre is opened 7 days a week from 8 am – 6 pm and caters for patients aged ten and over with minor injuries such as suspected broken bones, minor burns, scalds and cuts requiring stitches. M-UCC has x-ray facilities and applies plaster casts.

From September 2012 Dr Matt Murphy, Dr Mike Regan and Dr Mark Phelan from South Infirmary/Victoria Hospital will join our acute on call Medical Rota.
